DETAILED ACTION

Allowable Subject Matter

Claims 26-28, 30-42 and 44 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of record. As argued by Applicants, Gantley "clearly discloses that the protective coating, upon heating, becomes part of the membrane and, thus, adheres more tenaciously to the membrane than to the wafer so that the coating does not adhere to the pellets when the pellets are removed from the membrane". The cited prior art does not anticipate or make obvious, *inter alia*, "machining the plurality of components out of the substrate; releasing the bonding force between the carrier and the plurality of components with the application of UV light to the bonding force; detaching the plurality of components from the carrier in order to separate the plurality of components; and removing the protective layer after the machining step and before the detaching step", as required by Claim 26 and dependent Claims thereof. Moreover, the cited prior art does not anticipate or make obvious, *inter alia*, "machining the plurality of components out of the substrate by removing material all the way through the protective layer and the substrate and by removing material only part way into the carrier; removing the protective layer; releasing the bonding force by the application of UV light; and detaching the plurality of components from the carrier" as required by Claim 44.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

“Comments on Statement of Reasons for Allowance.”
